

Demography and selection during the maize domestication bottleneck

Timothy M. Beissinger *, Many many others for certain, and Jeffrey Ross-Ibrarra *

*University of California, Davis

Submitted to Proceedings of the National Academy of Sciences of the United States of America

This is the abstract. It should probably be somewhere around 200 words. You should definitely check to be sure.

This is the beginning of the article. Notice the dropcap... that is a neat feature that PNAS likes, I think it looks pretty neat too!

This is an additional paragraph. The text will be repetitive for the moment, as I am testing things out!!This is an additional paragraph. The text will be repetitive for the moment, as I am testing things out!!This is an additional paragraph. The text will be repetitive for the moment, as I am testing things out!!
